

# *THE DOWN SYNDROME CONNECTION OF LONG ISLAND*

PROUDLY INVITES ALL

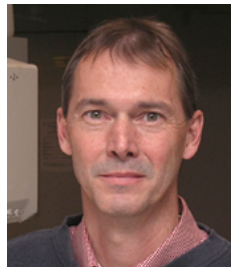

*MEDICAL PROFESSIONALS, SERVICE PROVIDERS, EDUCATORS AND FAMILY MEMBERS OF INDIVIDUALS WITH DOWN SYNDROME*

*TO ATTEND AN INFORMATIVE EVENING AT THE PRESTIGIOUS*

**GUEST SPEAKER – CRAIG C. GARNER, PH.D.**

*Co-Director of the Center for Research and Treatment of Down Syndrome at Stanford University*

**TUESDAY, APRIL 8TH, 2014**

**7:00 PM**

**GRACE AUDITORIUM**

One Bungtown Road  
Cold Spring Harbor, NY

## ***DEVELOPING THERAPIES TO IMPROVE COGNITIVE ABILITIES OF INDIVIDUALS WITH DOWN SYNDROME***

**Come and learn about the revolution within the Down syndrome scientific community to begin developing viable pharmacotherapies for children and adults with Down syndrome.**

For too many years, the complexities associated with Down syndrome had led many physicians and scientists to throw up their hands and ask parents to accept their child's challenging fate. Over the last two decades a small group of dedicated scientists have revisited this very same complexity problem and have made some incredible discoveries. For the first time, neuroscientists and pharmaceutical companies are working with parents to make the dream, that every individual with Down syndrome can live and work independently, an attainable reality.
